New pricing structure for Sandvik Hydraulic and Instrumentation tubing

Throughout the European, Middle East and Africa (EMEA) area, Sandvik Materials Technology is introducing a new pricing structure for its extensive range of Hydraulic and Instrumentation tubing, effective from December 2, 2013.

"Sandvik is the only manufacturer in Europe offering a comprehensive stock program of both standard and special grades of seamless stainless steel tube and pipe," explained Jan Sörlien, Global Sales Manager at Sandvik Materials Technology. "Recently, we added the new 254SMO grade qualified according to NORSOK into the stock program. Our customers will not have to wait long for deliveries as most products are available for quick and efficient delivery."

"Implementation of this new pricing structure takes us another step closer to providing consistency for our customers by aligning the whole stock range of Sandvik tubular products across the EMEA area," adds Jan Sörlien.

The change covers the complete range of stocked products for deliveries within EMEA. All quotations and order acknowledgements provided before December 2, 2013 will remain valid.

A complete stock range of Sandvik Hydraulic and Instrumentation tubing, along with the relevant standards, can be found at : www.smt.sandvik.com
